My washer broke for the first time in 21 years... Wasn't sure if it was worth fixing. Figured I had nothing to lose for a few dollars on the part. What an awesome understatement that was! Best investment I ever made for only a few dollars. Youtube videos made replacing the part an extra easy task. Took about 20 mins to replace the part from start to finish. Spent an additional 2 hrs cleaning up the inside of my washer so now it looks like new inside & out.

Maybe now I will get another 20 years out of it!
